CREATED TO CREATE

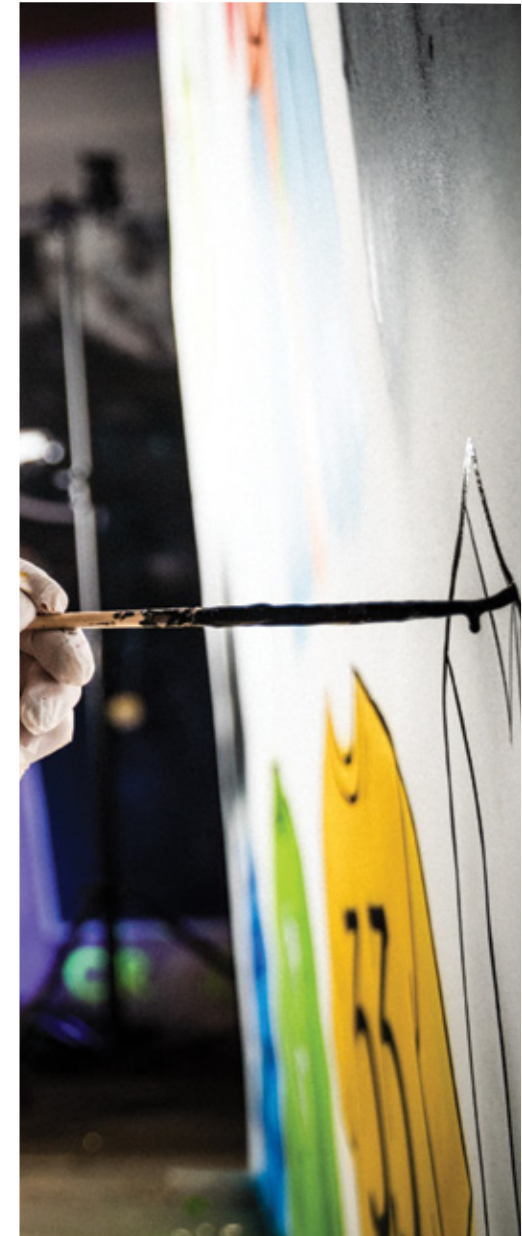

“Stebo Art” stands for the perfect symbiosis of traditional painting and innovative street art. My art style is always one step ahead and reflects the development of technology.

When choosing my materials I focus on the highest quality and offer a wide range of classic, ecological and fluorescent colors. In addition, I give my works a special value by integrating 24-carat gold, epoxy resin and NFC chips.

My artworks include both free and special commission finishes. In addition, together with my team, I offer workshops for individuals, businesses and public institutions..

You are looking for the special, the individual and the tailor-made? My art is characterized by its individuality, where a design can be made according to your wishes.

From logos, to comic-based figures, to photo-realistic motifs - with me everything is possible. I am your contact if you want to turn your visions and ideas into unique works of art. Let's create something extraordinary together, which corresponds exactly to your ideas.

“Urban Art transcends the boundaries of Traditional Art”

With my different approaches, I am very passionate about designing a wide variety of surfaces such as canvases, facades, garage doors and even objects such as refrigerators or coffee machines.

In order to offer you a comprehensive service, I rely on diversity in color or design. This enables me to create custom artwork in an elegant black and white ensemble or a colorful design of your choice. Precious gold or stimulating fluorescent colors can also add a unique touch to your artwork.

Are you interested in taking your business or brand to the next level? Then I would be happy to get in touch with you: Let's work together to transform your visions and ideas into unique works of art that reflect your corporate philosophy.

WORKSHOPS

Let your creativity run free. Whether in public facilities, on facades, canvases or wooden panels.

In my workshops, participants can gain new experiences, learn new techniques and express themselves in a special way. The focus is also on the playful strengthening of their own abilities. Our workshops are individually tailored to your needs: From the workshop duration, which can last from a few hours to several days, to the specific design - everything is tailored to your wishes.

Together we create a creative environment in which participants can develop their individual skills and try out the world of art. I invite you to be inspired by my workshops and create unforgettable works of art together.

Whether you want to learn the techniques of urban art or focus on team building - together with my team I offer you a tailor-made experience.

“The workshops challenge self-esteem, teamwork, creativity, perseverance and much more.”

SHOW

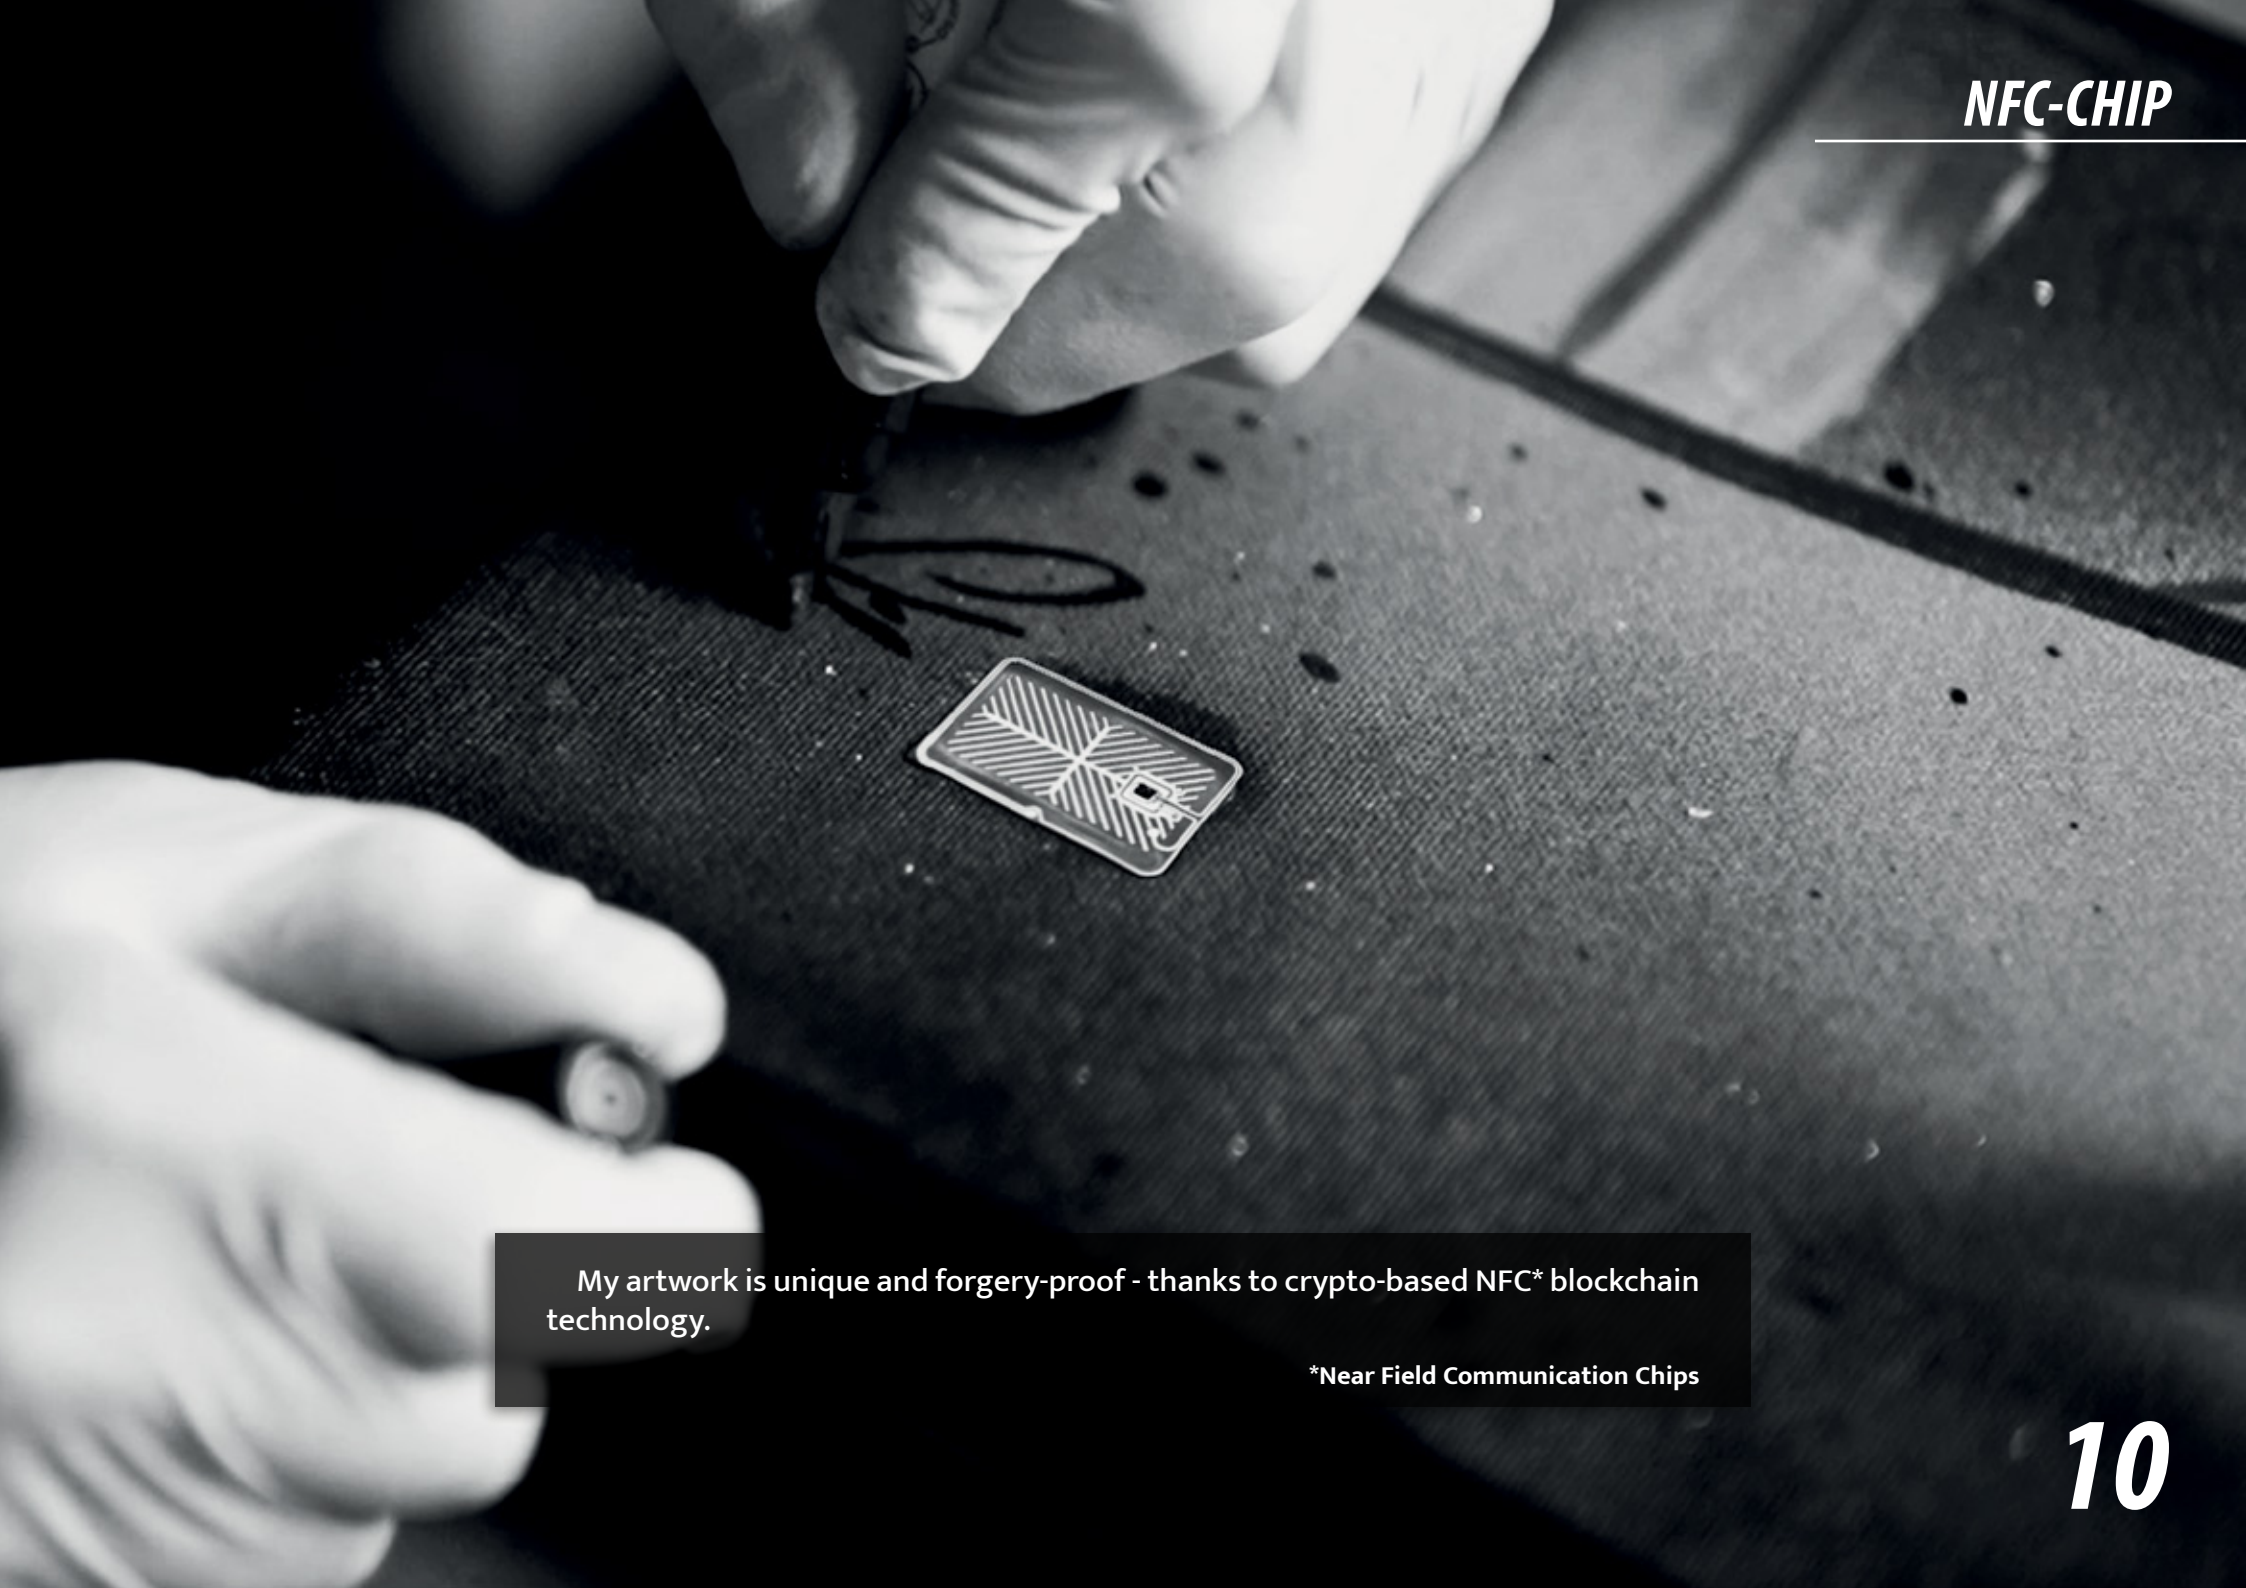

LIVE ART

Would you like to experience a unique and unforgettable celebration or product presentation? Are you looking for something extraordinary that your guests will remember for a long time?

“Urban Art Goes Live” is the perfect solution for any occasion. I provide a variety of formats that are completely tailored to your individual wishes and needs.

LIVE ART

My artwork is unique and forgery-proof - thanks to crypto-based NFC* blockchain technology.

*Near Field Communication Chips

The use of epoxy resin enhances the brilliance and depth of artworks and increases their luminosity. This sealing method can be used on various surfaces such as canvases or furniture and provides reliable protection against harmful UV radiation as well as external influences.

STEBO APP

STEBO APP

AUTHENTICATION MADE EASY

The authenticity of my works can now be easily confirmed via my smartphone app with any NFC-enabled device. A simple scan of the integrated NFC chip also provides you with detailed information about my artwork.

STEBOCHIP

The Stebo NFC chip (Near Field Communication) is a small, sophisticated microchip. For vehicles, the NFC chip is used as a keyless access system that allows drivers to unlock and start their vehicles. The chip, which is typically integrated into a key card or smartphone, communicates with the vehicle's NFC reader for a convenient and secure access experience. Thanks to NFC technology, owners can enjoy a seamless and effortless driving experience that makes owning a car even more enjoyable and convenient.

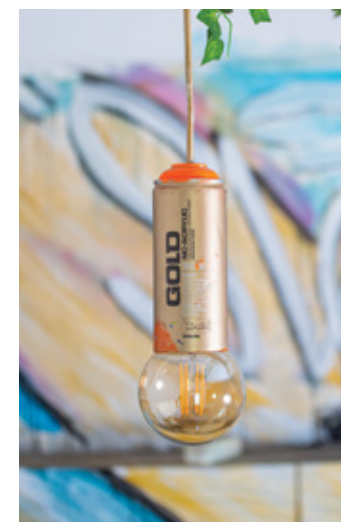

THE FUTURE.

INTERIOR DESIGN

Let your walls and furniture come to life and give your space an exceptional touch with the creative fusion of street art and interior design.

GRAPHIC DESIGN

As creative minds, my team and I are not limited to designing walls and facades - we can also score points with our expertise in graphic design. We translate your visions and ideas into appealing graphics to give your company the perfect look. Whether logo design, flyer or web design - we bring your message to the point and make sure that you are remembered. Take a look at our already successfully executed works.

Rekord-Verkauf der ArtsyApes

Stefan Temmel und Mika Siebo ist mit NFT-Kunst erfolgreich.

NFT-KUNST. Innerhalb von nur 36 Stunden wurden alle 3.777 „Non-Fungible Token“ (NFT) aus der ArtsyApes-Sammlung verkauft. Das Kunstprojekt des Grazers Siebo wurde international gelauncht.

Von Vito Radovic
 @vito.radovic@graz.at

ArtsyApes ist eine digitale Kunstsammlung mit physischer Fortsetzung des Grazer Künstlers Stefan Temmel, auch bekannt unter dem Künstlernamen Siebo. Während bisherige NFT-Sammlungen hauptsächlich digital erstellt wurden und auch nur für den virtuellen Raum existieren, haben alle Bilder aus Temmels Sammlung rein physische Ursprünge. „Ich bin davon überzeugt, dass das Anwendungspotenzial der NFT-Technologie nicht auf digitale Kunst beschränkt ist, sondern auch die reale Kunstwelt nachhaltig beeinflussen wird“, erklärt Temmel. „Unsere Sammlung ArtsyApes ist echte Kunst – quasi zum Angreifen: Zuerst werden die einzelnen Elemente gemalt und in verschiedenen Kombinationen digital verkauft. Nun können die ArtsyApes als echte Kunstwerke auf Leinwand erworben werden.“ Die Bewer-

traits wurden von Temmel persönlich gesprayt und gemalt und anschließend von seinem Team digitalisiert und als NFTs aufbereitet. 3.777 Non-fungible Token sind auf diese Weise entstanden – eine außergewöhnliche, digitale Kunstsammlung. Am 19. Februar war es dann soweit:

Die ArtsyApes-Sammlung wurde auf der Terra-Blockchain veröffentlicht und alle 3.777 der heiß begehrten NFTs von Temmel verkauft sich innerhalb von 36 Stunden. Schon einen Tag nach Verkaufschluss wurden einige der Kunstwerke um das Zehnfache des ursprünglichen Verkaufspreises gehandelt.

NFTs (Non-Fungible Token) sind die derzeit größte Entwicklung in der gesamten Kunstwelt. „Non-Fungible“ bedeutet wörtlich, dass die Kunstwerke („Tokens“) einzigartig sind und durch nichts ersetzt werden können. Der Besitz eines NFTs ist eindeutig über die Blockchain nachvollziehbar, und Käufer wie Verkäufer werden auch über diese abgewickelt.

Ein NFT kann jegliches digitale Medium sein (Musik, Texte, 3D-Animationen und Co), aber der Großteil der jetzigen Aufregung um die Technologie dreht sich um das Potenzial, damit digitale Kunst zu erstellen und zu verkaufen.

Die Affen, die Menschen ähneln, wurden von Stefan Temmel persönlich gesprayt und gemalt und dann vom gesamten Team digitalisiert.

EXHIBITIONS

EXHIBITIONS

My artwork has taken me to numerous exhibitions where I have been able to showcase my artistic skills to national and international audiences. I am proud to say that my works have found favor with art lovers and collectors around the world and look forward to further exhibition opportunities.

„Kunstmarkt revolutionieren“

NEUE TECHNIK, flächendeckendere Kunstwerke sollen den Kunstmarkt revolutionieren, sagt Grazer Künstler.

Das Grazer Künstler Duo „Stross & Stross“ will seinen Kunstmarkt durch die neue Technik revolutionieren. Die beiden Künstlerinnen, Stefanie Stross und Barbara Stross, präsentieren ihre neuesten Werke in der Galerie Stross & Stross in Graz. Die Künstlerinnen haben sich für die Entwicklung neuer Kunstwerke entschieden, die durch die neue Technik revolutioniert werden sollen. PROJECTS

NOONBAR

TAKE ME TO THE NOON!

My team and I had the pleasure of designing the interior of Noonbar ramen restaurant. From fabricating the walls to choosing the appropriate lighting, we carefully planned and implemented everything. With our experience in creative interior design, we have created a unique and atmospheric place that will delight the audience and invite them to linger.

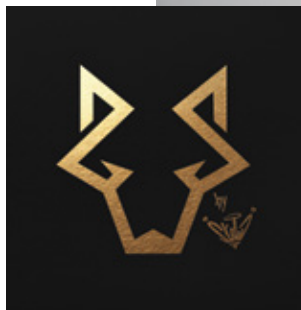

NEUROTH

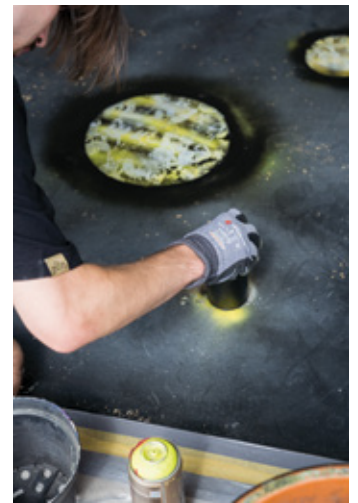

The Graffiti Live Spraying Show that my team and I put on was one of the highlights at Neuroth's 115th anniversary celebration.

WOLFART by STEBO

Together with WolfArt GmbH, we take floor design to a new level. Whether company logos made of gold leaf, cool graffiti or personal designs - we implement your ideas. Our works of art are finally sealed with epoxy resin to protect them from external influences.

Offices, pubs, garages and lobbies can be transformed into a unique experience.

SEIERSBERG

SHOPPING CITY

I had the honor to design a photo wall for the opening of the guest garden of the Shopping City Seiersberg.

HÄUSLBAUERMESSE

I presented and exhibited my work in the course of the 2023 Home Builders' Fair.
